

AUDIENCE GIVEN A RARE TREAT

The musical recital given in the Ogden tabernacle last evening was far better than even the most sanguine had anticipated. Three of Utah's leading artists, Prof. J. J. McClellan, organist of the Salt Lake tabernacle choir; Prof. Willard Weihe, the well known violinist and Alfred Best, the operatic tenor who has gained an enviable reputation for himself abroad as well as in his native state, never appeared to better advantage before any audience than that which greeted them at the tabernacle last night. Added to the work of this trio of musical stars, the Ogden tabernacle choir acquitted itself handsomely and reflected much credit upon Prof. J. J. McClellan, the able director.

Audience Entranced.
The program for the evening was elaborate, artistic and more than pleasing. The large audience which sat in the tabernacle appeared entranced during the entire evening, and when the last number had been completed there was a murmur which grew into words of praise and commendation for the work of the artists.

Alfred Best was in splendid voice. He sings his solos with great intensity of feeling and a thorough knowledge of musical interpretation. His voice is of great power, of beautiful quality and a wide range.

Prof. Weihe's work last night indicated the true artist. His technique and temperament being all that could be desired. Prof. McClellan showed his ability as an organist in his solo work and his solo accompaniments.

The Program Follows:
"God Is Our Refuge," by Dudley Buck, Ogden Tabernacle choir, Fantasia, "Appassionata," violin solo by Prof. Willard Weihe; "Cradle Song," Chopin (encore); Prof. Willard Weihe; Aria from "La Boheme," in Italian, Alfred Best; Grand overture to "St. Cecilia," Batiste, organ solo, Prof. McClellan; "Gavotte," from "Mignon," Thomas, organ solo (encore); Prof. McClellan; "Frank's Lullaby," "Waggoner," Tabernacle choir; (a) "Songs of Araby," Clay, (in English); (b) "La Donna Mobile," from Verdi's opera, "Rigoletto," (in Italian) Alfred Best; (c) "The Rosary," Nevin; (d) "Spring Song," Mendelssohn; (e) "Offertoire," Weber, Prof. McClellan; Evening Song, Schumann; "Cantata," Goddard, Prof. Weihe; "Thanks Be to God," from Mendelssohn's "Elijah," Tabernacle choir.

WHITE MEN RAID A JAP LODGING HOUSE

Three white men made a raid on one of the old shacks in the back of a Japanese house on Twenty-fourth street last night and when they got through they had overturned everything in the room.

There are a number of shacks built along the north fence of the Eccles Lumber company and from one of these the door in the back was picked loose and the door began to creak. Thinking that they could get at the goods easier outside, took them out into the lumber yard, back of the shacks and started to ransack them, when they were frightened away by one of the lodgers.

They had carried trunks, bags and everything they laid their hands on into the lumber yard and then threw the contents all over the yard. They used a chisel on two or three of the trunks in the room and scattered the goods all over. The place looked as though a miniature whirlwind had struck it.

One of the lodgers heard the noise and tried to get into the house but the door was blocked with a trunk, when the men were aware of the fact that they had been heard, they beat a hasty retreat through a back alley on Grant avenue and then went toward Twenty-fifth street.

The police were called, but when they arrived they found only a bunch of excited Japs and they could give no descriptions of the marauders.

CASES FILED IN CIVIL COURT

In the civil division of the municipal court this morning the following cases were filed:

W. A. Robertson vs. Ed. Butterfield for \$16.45 alleged to be due on an open account; H. T. Zwilling vs. M. Carrolls for \$79.35 on an account; Napeville Lounge Company vs. C. J. Herrick and company for \$234.50; W. T. Frazee vs. Clifford Potter to recover possession of a certain diamond stud alleged to be worth \$160; W. S. Donaldson vs. J. J.

S.S.S. HEALS SORES AND ULCERS

S. S. S. heals Sores and Ulcers in the very simplest way. It just goes right down into the blood and removes the cause, and the place is bound to heal because the impurities and morbid matters which have been the means of keeping the ulcer open are no longer absorbed from the blood. External applications of salves, lotions, plasters, etc., can never produce a cure because they do not reach the source of the trouble. At best they can only allay pain or reduce inflammation; such treatment is working on symptoms and not reaching the cause. Every nutritive corpuscle in the blood is weakened or infected, they cannot nourish the fibrous tissue around the place, but instead they constantly discharge matter which gradually eats into the sore a quantity of impure, germ-laden matter which causes the ulcer to enlarge. Since impure blood is responsible for Sores and Ulcers, a medicine that can purify the blood is the only hope of a cure. S. S. S. has long been recognized as the greatest of all blood purifiers, possessing the qualities necessary to remove every impurity from the blood. While curing the sore or ulcer S. S. S. brings about a healthy condition of the flesh by supplying it with rich, healthy blood, and thus makes the cure permanent and lasting. Book on Sores and Ulcers and any medical advice free to all who write.

KONDON'S
CATARRHAL DEAFNESS
Avoided and Cured

Prove this to yourself by writing us today for a free sample, postpaid, of this permanent, safe and speedy cure—aromatic, soothing, healing. Or ask your favorite Druggist for

Liberal Free Sample

Especially valuable in aural affections of children—mild, pure, and sanitary. Specially recommended by physicians for children with cold in the head, which soon brings on chronic nasal catarrh. Contains no harmful drugs. Sold only in sanitary, convenient tubes and recommended by over 50,000 doctors. 5¢ tube will be sent you. If you have Kondon's S. S. S. or 50¢ tube will be sent you postpaid on receipt of price, or absolutely free sample by

Kondon Mfg. Company, Minneapolis, Minn.

Olsen, for \$25.50 alleged to be due on an open account.

In the case of Spiros Eliopoulos against Christ Caros, judgment was rendered for \$22.55 and cost of suit.

A MEAN SERMON.

The service on Thursday evening at the Methodist church was one of unusual interest and power. Dr. Webster preached on, "Kadesh-Barnea," and held that the church was at the border of the Promised Land, but that there were giants in the way, which must be overcome. "If the church will go forward, God will take care of the giants, but go forward," said the speaker.

The evangelist announced that on Friday evening he would preach a mean sermon on "Sin." This sermon will be directed especially to those who are not Christians. A cordial invitation is extended to all. The male quartette will sing and the service will be very attractive.

NOTICE TO WATER USERS.

State Engineer's Office,
Salt Lake City, Utah, Sept. 30, 1909.
Notice is hereby given that Eva P. Lewis, whose post office address is Ogden, Utah, has made application in accordance with the requirements of the Compiled Laws of Utah, 1907, as amended by the Session Laws of Utah, 1909, to appropriate six (6) cubic feet per second of water from Cold Water Creek, Weber County, Utah.

Said water will be conveyed at a point 20 feet above the intake of the present Ogden City water pipe, from which the west quarter corner of Section 19, Township 6 north, Range 1 east, Salt Lake base and meridian, bears north 10 degrees east 2,100 feet distant, from which point it will be conveyed by means of a pipe line for a distance of 3,000 feet and there used from January 1 to December 31, inclusive, of each year, to develop power for the purpose of electric lighting and propelling machinery in Ogden City and resorts in Ogden Canyon, Utah.

After having been so diverted and used, the water will be returned to the natural channel of the stream, at a point from which the above described land corner lies east 2,580 feet distant. This application is designated in the State Engineer's Office as No. 2384.

All protests against the granting of said application, stating the reasons therefor, must be made by affidavit in duplicate and filed in this office within thirty (30) days after the completion of the publication of this notice.

CALEB TANNER, State Engineer.

DR. STILES SEVERELY CRITICIZED BY UNION

Washington, Oct. 21.—F. C. Roberts of the Central Labor Union of this city, addressing the convention of the United Textile Workers of America here today, severely criticized Dr. C. A. Stiles of the United States public health and marine hospital service for defending before the Southern Textile association at Raleigh, N. C., the employment of children in the cotton mills of the south.

Mr. Roberts expressed surprise that a public officer, paid from the public revenue, should appear before a convention of employers of labor and undertake to defend the system of child labor in southern states.

Mr. Roberts advocated action by the convention in opposition to any attempt to further extend such employment, which, he said, merely tended to displace adults.

TREASURY CONDITION.

Washington, Oct. 21.—Condition of the treasury today follows:

TRUST FUNDS.

Gold coin, \$572,570,369.

Silver dollars, \$487,117,300.

Silver dollars of 1890, \$4,409,000.

Silver certificates outstanding, \$287,417,000.

GENERAL FUND.

Standard silver dollars in general fund, \$2,561,113.

Current liabilities, \$107,145,110.

Unredeemed bonds, in treasury of fiscal, \$25,875,796.

In banks to credit of treasurer of U. S., \$4,180,477.

Subsidiary silver coin, \$19,017,934.

Minor coins, \$17,687,635.

Total balance, \$87,597,783.

LORD HAS BEEN GOOD TO TEXAS

Gregory, Texas, Oct. 21.—President Taft had his education as a ranchman further enhanced today by another afternoon's ride on his famous horse.

The president motored over to Taft eleven miles, to visit the town which gave him its unanimous vote in the election and in the school house there he made a little speech of thanks and congratulations to his brother's farm hands. On his way to Taft the president stopped in at the cotton gin and watched its operation. There he saw for the first time a steam plow. Next he was taken to the creamery where he ate a dish of ice cream and just before going to the school house he had a look at the abattoir which was not in use.

During the morning the president played 18 holes of golf with Robert Connelly of Austin, the reputed champion of Texas, who laid out the links on the Taft place. The president invited Mr. Connelly down to see a "belting" but the young Texan led his distinguished opponent from the first hole. Tomorrow the president will break into his four days vacation long enough to go over to Corpus Christi on the revenue cutter, Windol, to speak before the Inland Waterways association.

The president was given a great cheer as he arose to speak in the school house.

"I am glad to be here," he said, "under the fraternal auspices of my brother and his wife. I have heard of his ranch for a good many years. I heard of it from Mr. David Sinton, Mrs. Taft's father who offered me the job once if I could not make a better living of my coming down on his ranch and naming the calves, and while it seemed to be a work that would probably take all my time, the amount I earned per calf did not seem to be enough to be attractive."

"Is there anybody who is kicking? I don't think you would have him in the community if he did. Certainly the Lord has been good to this part of the country. The opportunity for development here seems to be unlimited. The air and this land run on without a hill and without anything to interfere with your outlook that I should think you would get a little tired looking over into the next pasture."

"The country seems to be taking on a new development with reference to the agricultural products necessary to feed the people. It is taking this on because everything that the farmer produces is most expensive to buy. He gets the highest prices today that he ever has, and therefore everyone who is looking forward to making a decent living is considering whether he has in him the elements of a good farmer, for there is no doubt that, taken as a class, the farmers are the most contented of any class in the country."

"I am glad to see that the largest building in the town of Taft is the schoolhouse and where the schoolhouse is the most important building you can be very certain of several things. One is that there is no race suicide and the second is that they are looking forward to the education of their children."

"My friend, Mr. Green, tells me that unlike a good many other towns in Texas, I received all the votes there were in the town of Taft. I am to return my thanks to my fellow citizens who were willing to break the Texas record and bring in one little ewe lamb."

"The dangerous game of Africa," he says, "are the lion, buffalo, elephant, rhinoceros and leopard. The hunter who follows any of these animals always does so at a certain risk of life or limb, a risk which it is his business to minimize by coolness, caution, good judgment and straight shooting. The leopard is in point of speed and ferocity the most dangerous of the four, but his small size always renders it likely that he will merely maul, and not kill a man."

"My friend Carl Akely, of Chicago, actually killed a leopard while on a spring in the State Engineer's Office, Salt Lake City, Utah, Sept. 30, 1909. Notice is hereby given that Joseph Combe, whose post office address is Utah, Utah, has made application in accordance with the requirements of the Compiled Laws of Utah, 1907, as amended by the Session Laws of Utah, 1909, to appropriate two hundredths (2/100) of a cubic foot per second of water from the Joseph Combe Spring, Weber County, Utah. Said spring is situated at a point which bears north 52 degrees 20 minutes east 3,395 feet from the south west corner of Section 14, Township 5 north, Range 1 east, Salt Lake base and meridian. Said water will be diverted at the place where it issues from said spring, by means of a pipe line and conveyed for a distance of 100 feet and there discharged into a series of troughs, where it will be used during the period from January 1 to December 31, inclusive, of each year, for stock watering purposes. This application is designated in the State Engineer's office as No. 2484.

All protests against the granting of said application, stating the reasons therefor, must be made by affidavit in duplicate and filed in this office within thirty (30) days after the completion of the publication of this notice.

Made of Forest Roots

Dr. Pierce believes that our American forests abound in most valuable medicinal roots for the cure of most obstinate and fatal diseases, if we would properly investigate them; and, in confirmation of this conviction, he points with pride to the almost marvelous cures effected by his

"Golden Medical Discovery"

which has proven itself to be the most efficient stomach tonic, liver invigorator and blood cleanser known to medical science. Dyspepsia, or indigestion and torpid liver yield to its curative action.

The reason why it cures these and many other affections, is clearly shown in a little book of extracts from the standard medical works which is mailed free to any address by Dr. R. V. Pierce, of Buffalo, N. Y., to all sending request for the same.

Not less marvelous, in the unparalleled cures it is constantly making of woman's many peculiar affections, weaknesses and distressing derangements is

Dr. Pierce's Favorite Prescription,

as is amply attested by thousands of unsolicited testimonials contributed by grateful patients who have been cured by it, often after many other advertised medicines, and physicians had failed.

Both the above mentioned medicines are wholly made up from the glyceric extracts of native, medicinal roots. The processes employed in their manufacture were original with Dr. Pierce, and they are carried on by skilled chemists and pharmacists with the aid of apparatus and appliances specially designed and built for this purpose. Both medicines are entirely free from alcohol and all other harmful, habit-forming drugs. A full list of their ingredients is printed on each bottle-wrapper. Don't accept secret nostrums as substitutes for these medicines OF KNOWN COMPOSITION.

Speaking of Nickels

And November, here is a unique proposition in quality values.

Step to your newsdealer with a nickel and buy a November number of THE LADIES' WORLD.

Of course you know about THE LADIES' WORLD—but have you ever realized how really great it is as a home magazine?

Take your November LADIES' WORLD home and study it from every side.

Then try to think of some other magazine at twice the price that gives as much real interest value to you.

You will read the story of the beloved Henry Ward Beecher.

"Worth the price of the magazine," you will say.

You will become absorbed in Charles G. D. Robert's fine serial beginning in this issue.

"That's worth the price, too."

You will find an article on the health of children that will be a surprise to you—and a great help.

The article on dressmaking, that bears particularly on the coming winter's needs, you will find peculiarly pertinent.

"Each worth the price," you will repeat.

And so from cover to cover you will find the quality—the class—that you generally expect to pay two or three nickels for.

It is pleasant to make a discovery like that, isn't it?

Three million readers have discovered it already and now they "can't keep house without THE LADIES' WORLD."

The November number is looking at you from the news-stand now. Perhaps you prefer to study it for a year—fifty cents to

THE LADIES' WORLD
NEW YORK

P. S. The price—five cents—is a matter of pride with the publishers.

tween the neck and shoulder, and the lion fell over on his side."

TO OUR ELECTRIC CONSUMERS

Now that the days are getting shorter and winter is approaching, you should put in tungsten lamps in rooms where you use the most light. The lamps cost more, but the saving is in the small amount of current required by them.

Electric meters run the same and are just as correct in winter as summer, but the enormous difference in the burning hours; for light required makes the bills so large that people usually blame the meter.

Remember also that you can buy first class Edison lamps from us, and when the lamps are blackened or burned out, we exchange the eight and sixteen candle power lamps for 10c and the thirty-two candle power for twenty cents.

Call at our office or on phone and we will explain more in detail about the Tungsten lamp. Our engineer will advise you free of charge how to light your stores with the smallest consumption of current. Our aim is to assist the consumer in keeping his lighting bill down.

Have you a little gas heater in your office; why not?

UTAH LIGHT & RY COMPANY
